SUPPLY CHAIN

At TGL Pakistan we know-how to manage, plan and execute supply chain activities for optimized effectiveness and efficiency. For enterprise-level companies with a high degree of logistics complexity, we work hand in hand with you to find the best-fit supply chain solutions.

By partnering with TGL Pakistan, you gain access to invaluable industry insight, decades of supply chain expertise, and a dedicated supply chain solutions team that integrates with your own to help you strengthen and streamline your supply chain logistics practices

BREAK BLUK SHIPING

Break bulk shipping involves the transportation of cargo that does not fit into standard or special shipping containers. Items are packed into bags, pallets, drums, or boxes, or loaded as-is onto the vessel. Break bulk cargo is loaded using cranes, rolled, or wheeled on board. For cargo to be considered break bulk, it must be loaded individually, without using any shipping container. Typical items shipped as break bulk include minerals, grains, ores, oils, and gases. Additionally, break bulk encompasses large machinery, building materials, and construction vehicles. With over 30 years of experience in transporting oversized and heavy shipments and boasting an unparalleled global network, we have the capacity to deliver your special cargo to any part of the world. Our international team of special cargo experts possesses in-depth knowledge and understanding of the challenges involved, and they are dedicated to helping you every step of the way. Whether you require assistance with handling unique logistics or navigating complex transportation requirements, our team at Tandem Pakistan (pvt) Ltd is here to provide reliable and efficient solutions.

LOGISTICS

Logistics involves the effective management of supply and transportation to ensure timely and safe delivery of goods. Handling operations is a crucial aspect of the logistics industry, and in today's competitive world, the demand for efficient and cost-effective operations is paramount. At Tandem Pakistan (pvt) Ltd., we offer comprehensive order processing and a range of services, including warehousing, picking, packing, and shipping. As a logistics company, we excel in receiving, processing, and storing inventory from merchants. Our services encompass Consolidation, Warehousing, Distribution, and P.O. Management, providing you with streamlined solutions to optimize your supply chain and meet your logistical needs effectively. With our expertise and commitment to excellence, we ensure that your goods are managed efficiently and delivered with utmost care and precision.

CONSOLIDATION

Consolidation is the process in which a carrier or shipping company combines several smaller shipments into one full container. This practice benefits both the carrier and the shipper. For the carrier, consolidation reduces the cost of shipment and expedites the delivery of goods. As for the shipper with a smaller shipment, they avoid the need to pay for an entire container shipment.

At Tandem Pakistan (pvt) Ltd., we excel in performing consolidation activities worldwide. Our extensive experience and adaptability to changing environments have enabled us to enhance our portfolio and become experts in providing the best consolidation services to our valued clients for both import and export operations. Our comprehensive services encompass Customer Services, Port Operations, and Sales, ensuring a seamless and efficient experience throughout the consolidation process. With a commitment to delivering the highest level of satisfaction, we take pride in being your trusted partner in consolidation services.

WAREHOUSING

A strategically located warehouse, connected to your sourcing areas, plays a vital role in combining materials and goods before export, thereby optimizing your landside movements and container loads. At Tandem Pakistan (pvt) Ltd, our diverse portfolio includes both bonded and non-bonded warehouses, with facilities situated within free trade zones, as well as those in close proximity to ports for seamless transfer to ships.

We take pride in offering a wide range of services, including domestic and regional/international consolidation, catering to multi-country operations. Whether you require consolidation services for your local or global supply chain, our warehouses are equipped to efficiently manage and streamline your goods, ensuring smooth and cost-effective shipping solutions. With our commitment to excellence, we provide you with reliable warehousing options that contribute to the success of your business and supply chain optimization.

OUR NETWORK

Tandem Global Logistics is a comprehensive international network of independent logistics operators - serving the worldwide trading market under a common image and strategy - who have been working together for over 20 years.

This forwarding network has a presence in major industrial centres the world over:

- More than 75 countries
- More than 200 offices
- The network is constantly expanding

All these agents gather at the Annual General Meeting (AGM) which is held at a different location every year, to strengthen their business relationships, to exchange ideas how the network and the service to the customer can be optimized and to exchange actual business and sales leads.

Tandem Global Logistics has an in-depth knowledge of the global supply chain in air and sea freight and constantly focuses on meeting changing customer demands by broadening its global services into a powerful and interactive network.

The network operates independently from sea freight and air freight carriers under its own House Bill of Lading which is accepted worldwide. The network structure is built on long-term commitment and maintains the policy of:

- Quality
- Cost-efficiency
- Reliability
- Flexibility

Operations are performed under a close personal relationship with customers who appreciate the dual advantage of worldwide coverage together with a local market knowledge that each partner provides. This makes Tandem Global Logistics the supply chain service provider of choice for numerous leading industries across the globe.
